William Matthews DPhil MEng

EDUCATION

University of Oxford, University College

October 2019 - December 2023
Oxford, UK

- · Silicon Photomultipliers as Optical Wireless Receivers in Ambient Light. Supervisor Prof. Steve Collins.
- · Published a total of thirteen papers, with more in draft. Presented at three conferences.
- · Achieved world-record data-rates using a SiPM as a receiver with On-Off Keying and OFDM.
- · Created a high-performance Monte-Carlo simulator of SiPMs in C++.
- · Invented and optimised novel optics for solid-state solid angle filtering.

University of Oxford, University College

Matriculated 2015 - Graduated 2019

First Class MEng Engineering Science

Oxford, UK

- · Mathematics and Statistics-dense course. Specialisms in Information (ML, Signal Processing, Communications), Robotics (Control, Planning, Machine Vision), Math, Plasmonics and Semiconductors.
- · Earned a Scholarship for First Class performance.
- · 3rd Year Projects: 'Control of an Ammonia-Based ESS' & 'Optimal FIR Filter Generation'.
- · 4th Year Project: 'Graph Modulation: Ultra-efficient Communication and Storage for 6G Systems'. Supervised by Prof. Justin Coon.

EXPERIENCE

Avos Ltd.
Software Engineer

July 2023 - Present

Cambridge, UK

- · Startup in stealth mode.
- · Full stack software Engineer with focus on backend and data engineering.
- · Wrote a significant amount of Golang, Python (for R&D), SQL, and React.
- · Core responsibilities in data cleaning, knowledge creation, curation, and recall.
- Developed entire pipelines for data ingestion, prompt construction, LLM output processing and more.
- · Notable experience with various LLM APIs, prompt engineering, and data pipelines.
- · Experience with embedding models, vector databases, search engines, and RAG.
- · Became the go-to person for all matters NLP and ML, and led the 'Al team' in the company.
- · Read multiple papers a week and implemented research into the company's products where appropriate.
- · Formed a close working relationship with the CEO and CTO, and gave guidance on the company's direction with respect to NLP.
- · Wrote recommendation systems to surface relevant information custom to each user.

Oxford University Racing

May 2019 - September 2020

Chief Software & Electrical Engineer

Oxford, UK

- · Managed a team of ten people. Led the development for key electric vehicle systems.
- · Responsible for all low voltage electrical systems and software on the vehicle.
- · Developed a continuous integration system for vehicle control unit software, among other circuits.

PrOXisense Ltd.

July 2018 - September 2018, July 2019 - April 2020

Intern, Consulting Software & Electrical Engineer

Harwell, UK

- · Solely responsible for creating critical software to process sensor data, as well as processing raw signals for customer demonstrations, sensor calibration and internal R&D use.
- · Created a custom thermal simulation package to guide future thermal product sensor development.
- · Using Kalman filters, improved sensor accuracy and precision for blade tip timing and clearance measurement by a factor of 200 through my own initiative.
- · Processed and presented results to clients, leading towards two new contracts.

TECHNICAL STRENGTHS AND CAPABILITIES

Languages Go, C/C++, Python 3, MATLAB, SQL, bash, PHP, Type/JavaScript

Markup HTML, CSS, LATEX

Workflow zshell, tmux, vim, git, ssh, VSCode

Software React, Simulink, KiCAD, FreeCAD, Solidworks, Wireshark, GIMP **Methods** Discrete and Continuous Signal Processing, Machine Learning,

Optimisation, Statistics, Data Visualisation

Comfortable with Torch, Keras and Tensorflow. Wrote an autograd from the ground up.

Daily-drives GNU/Linux. Experienced at designing, building and testing RF circuit boards, 3D printing.

HOBBIES AND INTERESTS

Running, Fishing, Squash, OpenStreetMap Contributor.

I enjoy fiddling with my blog (when I can find the time), and working on various software projects. I have recently started to contribute to the open source community, and have a few small projects on GitHub. Attempting research into ML in my own time, with a personal goal to publish a paper in the field within two years.
